## 9 Kanûn 2017

Hi dear friends! Last night we did our second meeting of Bashur Local Node. During the meeting we discussed about many topics of FairCoop and FairCoin.

Especially the mentality background of FairCoop, its development during 3 years, and the reality of being out of state and all its organizations and forces. How can we able to create an alternative economic system which serve just community.

Another topic was, to finish the technical steps of becoming member at ocp and to activate all our members. For this, we help each other and work collective.

In the meeting also we talked about some ideas of cooperatives and the opportunity of how can we achieve it in our local reality. On this topic, we have more than one idea and some of them are; to open a cooperative for handmade clothes, also we can open a cooperative of vegetables. The ideas are not clear yet, but also we are looking for the best and which fits our local reality. Another idea which is ecological and is a serious need here in our country is electricity. So if we can bring and make it ecological; with solar energy and panels. The possibilities are discussed. In the future days it will be clear and we will write the plan and its needs and present to concerned managers of FairCoop.

During last week we activated our local's email account and now we are at FairMarket. So after activation of our members we will use it better and send products.

On the other hand, one of our friend translated the web page and some posts into Kurdish. It will continue and be better.

With best regards from Kurdistan
