

Phoncoop management service project

The main part of roadmap is very simple:

- Any member can have a SIP number(for VoIP communications) for free.
- Anyone can have a geographic telephone number(ex. +34XXXXXX) for a very small cost.
- All the technology uses FLOSS, using the Asterisk* blueblox managing system.
- Entrance portal will be available at admin.sip.freedomcoop.eu to manage the bluebox.
- Users can use *CSipSimple* app in their smartphones to make phonecalls to other SIP numbers or geographical numbers.

Useful notes:

- Service is provided by Capa8 cooperative in Catalonia.
- 300 eur was paid for installation with a 70eur/month being paid monthly.

If you want to help, say Hi! at the [Phoncoop Management telegram group](#).
