

FairCoop Summer Camps

Every year, people involved in FairCoop are trying to organize a summer camp. The main goal is to have a physical meeting form those who are working on the global level but also on the local level, to interconnect and strengthen the community and personal relations as well as getting work done which are especially difficult to organize and accomplish online. Thus, the gathering intents to be a synergizing event to create new ideas and solutions from the collective and plan actions to bring those into reality.
