

## Websites for all

Local Nodes are the vital core of the ecosystem and from Tech area we're constantly available to fully support them, so please, ask in Tech Telegram group or to @encosianima (Area's facilitator) whether the need is pressing.

Currently, the possibility for local nodes to have their own page up and running is related to two factors:

- If you have your own hosting or using any free blog platform, just ask for a subdomain, namely sort of *your\_name.fair.coop* in Tech area.
- If you don't have hosting, but want to have one in order to have more features and support, there are a few faircoin-paid hosting providers here:
  - <https://www.qwass.com/> (nodes like <http://galiza.fair.coop> are using their hosting support)
  - [Dimensis.com](https://www.dimensis.com/)
  - <https://cloudvault.me/>

NB list above is perhaps outdated, an update is on its way.
