

Orientation Area

The Orientation Area is where we coordinate work that aim to help newcomers to the ecosystem and increase the awareness of people in the ecosystem about the ecosystem.

We have four subareas:

- [Support](#) focuses on helping the community to provide help to each other
- [Documentation](#) helps to prepare tutorial, FAQs and other materials that can be used in Support
- [Learning](#) focuses on developing our area internal awareness and understanding of the ecosystem we aim to build
- [Education](#) organises workshops that help raise the awareness and understanding for people in the ecosystem

The Orientation Area is part of the [Open Coop Work](#), where we collaborate and build an organized workflow in the FairCoop ecosystem to be able to log our time contributions and participate in a monthly value distribution.

These are the tasks that are currently eligible for such compensation:

- [Giving special attention to welcoming people](#)
- [Preparing and hosting video introduction calls](#)
- [Developing tutorials for different tools of the ecosystem](#)
- [Preparing and hosting area internal learning workshops](#)

If you like to participate in these tasks, make sure you join the Orientation Area [Telegram Group](#) and coordinate your work with the rest of the group.
