

Who runs the cooperatively validated nodes

If you are active in the FairCoop network you are kindly invited to run a CVN. The CVNs collaboratively sign to legitimize the next block creator. More technically, they don't sign any following block except the next CVN ID.

Candidates should fill out the [application form](#). Your wallet should be online 24/7 and you should have read the [FairCoin White Paper](#). More information about technical and socio-political preconditions to run a CVN can be found [here](#). If you would like to run a CVN you can also send an email to cvn@fair-coin.org
